## New Hand Sanitizer

Austal USA has acquired a new hand sanitizer available to the workforce beginning today. 70 free-standing hand sanitizer stations will be placed throughout the campus today in high traffic areas. This sanitizer comes with additional use guidance and precautions. Please read below:

### About the Product

- Validation testing shows a 99.9999% effective kill rate on COVID-19
- The new sanitizer can be used for:
  - Topical human application (hands and arms)
  - Masks or Austal garment application (**Austal USA is not responsible for damage to personal garments. Apply at your own risk.**)
    - May be used to wipe down Personal Protective Equipment (PPE)  
**(Do not use on eyewear)**
    - Application Caution: Test small area before full application
- This product may feel different on your hands than previous available sanitizer.
- The new product is effective for longer periods of time
- FDA and EPA approved
- Maintains its environmental persistence for up to 30 days on most surfaces and fabrics.  
Reapply on hands as needed (**Do not use on aluminium, steel, shipboard equipment/material, or Austal equipment**)

### Please do not:

- Please do not waste, abuse or remove this product from the Austal facility.
- Please do not remove or tamper with the dispensers.
- For assistance with the machines, please email [siteservices@austalusa.com](mailto:siteservices@austalusa.com).
