

# CORONAVIRUS (COVID-19) COMMUNICATIONS

March 30, 2020

## **Austal USA Teammates,**

Unfortunately, we learned late this afternoon that a fellow employee has tested presumptive positive for COVID-19. Fortunately, this employee is reportedly recovering well at home. This employee has been offsite for unrelated reasons since Mar. 18. The employee was working 2nd shift in MMF phase 2 module H08C.

As per protocol, Austal medical has already screened employees that were in close proximity and fortunately they are not experiencing any symptoms. They will be isolated from the rest of the workforce for one shift in an abundance of caution. We are also deep cleaning the area as well.

As the cases continue to rise in our communities, please continue to follow the CDC guidelines for personal hygiene and social distancing both at work and home. Also, if you feel ill please notify your supervisor and see First Aid so you can be screened. Employees can also call (251) 445-1944.

I appreciate everyone's hard work and dedication to each other and in accomplishing our mission.

There is no doubt, working together we will get through this.

Craig
